

About Me

Hello, I'm Andrea. I am currently a student at Nanyang Polytechnic pursuing a Diploma in AI & Data Engineering, where I am developing in-demand skills in artificial intelligence, data processing, and real-world problem-solving. Prior to NYP, I completed my Higher Nitec in Electronics Engineering at ITE, gaining hands-on experience in programming, circuitry, prototyping, and IoT. This foundation strengthened my passion for engineering, technology, and building practical solutions.
